Neha Verma

Email: neha.verma@example.com
Phone: +91-9812345678
Location: Hyderabad, India
Expected Salary: ₹1,500,000

Professional Summary

Versatile and performance-driven Backend Engineer with 4+ years of experience designing scalable APIs, optimizing database performance, and building resilient microservices. Known for deep expertise in Node.js and .NET Core, and for architecting backend systems that support millions of concurrent users. Passionate about clean code, secure design, and automation-first development.

Skills

- Node.js, .NET Core, C#
- PostgreSQL, MongoDB, Redis
- RESTful APIs, GraphQL
- Docker, Kubernetes
- CI/CD with GitHub Actions
- HashiCorp Vault, OAuth2

Experience

FinTech Labs – *Backend Engineer*
Feb 2021 – Present

- Designed and implemented a high-throughput transaction API using Node.js and Redis, handling over 10 million requests/day.
- Migrated legacy .NET monolith to microservices architecture, improving deployment agility and fault isolation.
- Integrated HashiCorp Vault for secure secret management across containerized services.
- Led backend performance tuning, reducing query latency by 40%.

CodeSphere Technologies – *Software Developer*
Jul 2019 – Jan 2021

- Developed RESTful APIs for a SaaS analytics platform using .NET Core and PostgreSQL.
- Implemented role-based access control and JWT authentication.
- Automated deployment pipelines using GitHub Actions and Docker Compose.

Education

B.Tech in Information Technology

IIIT Hyderabad – Graduated 2019

- Capstone project on distributed caching strategies for real-time analytics.
- Member of the Systems Programming Club.

Certifications

- **Microsoft Certified: Azure Developer Associate** – Microsoft (2022)
- **Certified Node.js Developer** – OpenJS Foundation (2021)
